1. Purpose of the document

The purpose of this Functional Requirement Specification (FRS) document is to define and document the functional requirements of the **OpenCart E-Commerce Website**. This document describes the expected behaviour and functionality of the application from a user's perspective. It serves as a reference for identifying testable requirements and helps in designing comprehensive test scenarios and test cases

This document is divided into 4 sections:

- Project Overview
- Requirements
- Information Architecture

2. Project Overview

OpenCart is an open-source e-commerce web application that allows customers to browse products, search for products, manage shopping carts, and place orders through an online shopping platform. This foundation appeals to a wide variety of users; ranging from seasoned web developers looking for a user-friendly interface to use, to shop owners just launching their business online for the first time. OpenCart has an extensive amount of features that give you a strong hold over the customization of your store. With OpenCart's tools, you can help your online shop live up to its fullest potential.

3. Requirements

OpenCart requires certain technical requirements to be met for the store to operate properly. First, a web server must be created to make the OpenCart store publicly available on the web. Domain names and hosting services can easily be purchased for an affordable price.

When selecting a hosting service, you should check to see that these server requirements are provided and installed on their web servers.

These extensions must be enabled for OpenCart to install properly on the web server.

- PHP 5.4

- JavaScript
- Database (MySQL suggested)
- Web Server (Apache suggested)

4. Information Architecture

Store Front

This guide is intended to be used as an introduction to the OpenCart default storefront. The storefront reveals how the customer views and interacts with the store.

Figure 1

Home page

The home page is the most important page in the shop, in terms of presentation. In most cases, this will be the first page that a customer interacts with. The shop's homepage needs to be user-friendly, while at the same time highlighting the shop's products.

The first step in becoming familiar with the storefront is understanding the Structure of the OpenCart default homepage.

The header

The header will be displayed at the top of the page, on every page of the store; not just the home page.

Figure 2

The header has the following navigation options:

- **Store Logo:** Clicking on this logo will direct the customer back to the home page of the store.
- **Currency Block:** The customer can select which currency the store's products will be in by clicking on any of the currency icons.
- **Shopping Cart:** Displays the number of items purchased, and the total price of the order. Clicking on the button will contain all of the products added to the cart and an option to "View Cart" or "Checkout".
- **Search box:** The customers can type in the search box to search for a product within the store's product categories.
- **Links:** Links the customer to the Home page, Wish List, My Account, Shopping Cart, and Checkout.
- **My Account:** Customers can register or log in from here

The top menu

The top menu category only displays the top parent categories of products. See Categories for more information on how to create and assign product categories. Like the header, the top menu will be displayed on every page.

When the customer's mouse is dragged over a category, a drop-down menu will display the sub-categories for that parent category.

Figure 3

Slideshow

The slideshow displays several product banners of your choice by alternating the images in a slideshow. After a certain amount of time, one banner will shift to the next banner. Banners in this slideshow are useful for highlighting certain products to be easily accessible by the customer. When the banner is clicked on, the customer will be directed to the product on the banner's page.

Figure 4

Unlike the top menu and header, the slideshow in the OpenCart default can only be viewed on the home page in this position.

Featured products

OpenCart gives you the option of featuring specific products of their choosing on the home page.

The Featured section includes the product image, name, price; and an option to add the product directly to the Shopping Cart.

Figure 5

Footer

The footer is located at the bottom of every page, not just the Home Page. This block of miscellaneous links is useful in sorting relevant pages for the customer that may not be logically sorted anywhere else.

The organizational scheme of the footer can be divided into the following sections:

- **Information:** "About Us", "Delivery Information", "Privacy Policy", "Terms & Conditions"
- **Customer Service:** "Contact Us", "Returns", "Site Map"
- **Extras:** "Brands", "Gift Vouchers", "Affiliates", "Specials"
- **My Account:** "My Account", "Order History", "Wish List", "Newsletter"

Figure 6

Product Page

The OpenCart default product page will follow the structural format seen below.

The screenshot shows the OpenCart product page for the Canon EOS 5D. At the top, there is a navigation bar with currency, phone number, account links, and shopping cart. Below this is a search bar and a category menu. The product title 'Canon EOS 5D' is prominently displayed. To the left of the title is a large image of the camera, with smaller alternate views below it. To the right of the title, product details like brand, code, and price are listed. The price is shown as \$98.00, with a crossed-out original price of \$122.00. Below the price are buttons for adding to cart, wishlist, and sharing. Further down, there are sections for 'Available Options' and 'Reviews'. The 'Description' tab is active, showing a detailed paragraph about the camera's features.

Description Reviews (0)

Canon's press material for the EOS 5D states that it 'defines (a) new D-SLR category', while we're not typically too concerned with marketing talk this particular statement is clearly pretty accurate. The EOS 5D is unlike any previous digital SLR in that it combines a full-frame (35 mm sized) high resolution sensor (12.8 megapixels) with a relatively compact body (slightly larger than the EOS 20D, although in your hand it feels noticeably 'chunkier'). The EOS 5D is aimed to slot in between the EOS 20D and the EOS-1D professional digital SLR's, an important difference when compared to the latter is that the EOS 5D doesn't have any environmental seals. While Canon don't specifically refer to the EOS 5D as a 'professional' digital SLR it will have obvious appeal to professionals who want a high quality digital SLR in a body lighter than the EOS-1D. It will also no doubt appeal to current EOS 20D owners (although lets hope they've not bought too many EF-S lenses...) æ

Figure 7

The product page can be divided into the following sections:

- **Product image:** The product image can be displayed under the title on the left side, along with alternate views of the product underneath it in the smaller box. Clicking on the main image will expand the image within the window for the customer to see it in greater detail.
- **Product details:** The product code, availability, and price are displayed just right to the product image.
- **Cart:** The customer can select a quantity and add the product to their cart, Wishlist, or compare.
- **Rating/Sharing:** Underneath the cart can rate the product and/or share the product on different social media websites.

- **Description tab:** An area underneath the main product information to provide a detailed description of the product.
- **Review tab:** An area for the customer to write a review on the product.

Figure 8

Product Compare

The "Add to Compare" feature in the product section allows the customer to compare the different specifications, features, and prices of several products s/he might be interested in.

Figure 9

The customer is given the option to add one of the compared products to the cart if they want to. Pressing "Continue" will bring the user back to the home page.

Shopping Cart Page

Once a customer adds a product to the cart, they can access the shopping cart in the header under "Shopping Cart".

The screenshot displays the OpenCart Shopping Cart interface. At the top, the header includes the OpenCart logo, a search bar, and a shopping cart icon indicating 1 item(s) for \$98.00. Below the header, a navigation menu lists various product categories. The main content area is titled "Shopping Cart (0.00kg)" and contains a table with the following data:

Image	Product Name	Model	Quantity	Unit Price	Total
	Canon EOS 5D - Select: Blue Reward Points: 200	Product 3	1	\$98.00	\$98.00
Sub-Total					\$80.00
Eco Tax (-2.00)					\$2.00
VAT (20%)					\$16.00
Total					\$98.00

Below the table, the text "What would you like to do next?" is followed by a note: "Choose if you have a discount code or reward points you want to use or would like to estimate your delivery cost." Three options are listed with dropdown arrows: "Estimate Shipping & Taxes", "Use Coupon Code", and "Use Gift Certificate". At the bottom, there are two buttons: "Continue Shopping" and "Checkout".

Figure 10

The shopping cart gives an overview of the product selected by including the categories "Image", "Product Name", "Model", "Quantity", "Unit Price", and "Total". The customer has an option to add a coupon code or gift voucher or estimate shipping & taxes, before heading to the checkout. The "Continue Shopping" button links back to the homepage.

Creating an account

Before a customer can continue checking out a product from the shopping cart, the customer needs to select either guest checkout or log into their

account. The guest checkout doesn't require login details. Returning customers may want to make an account with the store.

There are a few ways a customer can make an account:

1. Checkout

The screenshot shows the OpenCart checkout page. At the top, there's a navigation bar with currency, phone number, and links to My Account, Wish List, Shopping Cart, and Checkout. Below this is the OpenCart logo and a search bar. A blue navigation bar lists various product categories. A breadcrumb trail shows the path from Home to Shopping Cart to Checkout. The main heading is 'Checkout', with a note about logging in for existing accounts. The 'Your Personal Details' section has two tabs: 'Register Account' (selected) and 'Guest Checkout'. It contains form fields for First Name, Last Name, E-Mail (pre-filled with 'admin'), and a Password field. To the right, there are dropdowns for Shipping Method and Payment Method, both set to 'Please Select'. Below these is a text area for 'Add Comments About Your Order'. On the right side, a table displays the order summary with product details, sub-total, taxes, and the final total. At the bottom right is a 'Confirm Order' button. The bottom of the form includes checkboxes for newsletter subscription and privacy policy agreement, followed by a 'Continue' button.

Continue

Figure 11

Step 1 of the checkout process allows the user to make an account before continuing with payment. Selecting "Register Account" will change Step 2 of checkout from Billing to Account & Billing details. Account & Billing asks for the same personal details as Billing, except that it asks for the user to create a password for their account. After Step 2 is completed, the customer may continue with the checkout process.

2. Header - “My Account”

Figure 12

Clicking "My Account" in the header will show the option for the customer to log in or create a Register. This page gives the customer an option to log in if they already have an account, or create a new account. In the "New Customer" section the customer can click "Continue" under Register Account to be directed to the "Register an Account" page.

A screenshot of the 'Register Account' page. The page has a breadcrumb trail: Account > Register. The main heading is 'Register Account'. Below the heading is a link: 'If you already have an account with us, please login at the [login page](#).' The form is divided into three sections: 'Your Personal Details', 'Your Password', and 'Newsletter'. The 'Your Personal Details' section has fields for First Name, Last Name, E-Mail, and Telephone. The 'Your Password' section has fields for Password and Password Confirm. The 'Newsletter' section has a 'Subscribe' label and radio buttons for 'Yes' and 'No'. At the bottom right, there is a 'Continue' button and a link to 'Privacy Policy'. In the bottom right corner, there is a 'Activate Windows' watermark.

Figure 13

Clicking "Register" will show the Create Account page. Here new customer have to put their “First Name”; “Last Name”; “E-Mail”; “Telephone” and “Password” to create a new account.

Figure 14

Clicking "Log In" will show the Log In page. Here, the customer has to enter their "E-Mail"; "Telephone" and "Password" to Log in.

Checkout

Once a product has been added to the cart, the customer can continue to the checkout to make their product purchase. The Checkout page can be accessed in the header section of every page (found under the search box). Customer checkout using OpenCart is a simple process that can be completed in 6 steps.

- **Step 1: Checkout options**

The customer can log into or register their account (as explained above), or select guest checkout.

- **Step 2: Billing details**

Personal details including "First Name", "Last Name", "E-mail", and "Telephone" are filled into a form. It also requires the customer's address details.

- **Step 3: Delivery details**

In Billing Details, the user can check a box to indicate that the delivery details and billing details are the same. This will cause it to skip over this step to the Delivery Method. If the delivery details are different

from the billing details the customer can enter this information in a form in this section.

- **Step 4: Delivery method**

A method of shipping is selected here. A comment box is added for the customer to add comments about their order.

- **Step 5: Payment Method**

The customer selects their method of payment here and may add comments in the comment box.

- **Step 6: Confirm Order**

In this last step, the customer will see an overview of their purchase; including the product description, quantity, and price (with tax & shipping).

The screenshot displays the OpenCart checkout interface. At the top, a navigation bar includes a currency selector, a phone number (123456789), and links for 'My Account', 'Wish List (0)', 'Shopping Cart', and 'Checkout'. The 'Shopping Cart' link is highlighted, showing '1 item(s) - \$98.00'. Below the navigation bar is a search bar and a category menu with options like Desktops, Laptops & Notebooks, Components, Tablets, Software, Phones & PDAs, Cameras, and MP3 Players. The main heading is 'Checkout', with a note for existing users to login. The form is divided into several sections: 'Your Personal Details' with fields for First Name, Last Name, and E-Mail (containing 'admin'); 'Shipping Address' with fields for Company, Address 1, Address 2, City, Post Code, and Country (set to 'United Kingdom'); 'Your Password' with a Password field; 'Shipping Method' and 'Payment Method' dropdown menus; and an 'Add Comments About Your Order' text area. A summary table on the right lists the product '1x Canon EOS 5D - Select Blue' for \$98.00, with a sub-total of \$80.00, Eco Tax of \$2.00, VAT of \$16.00, and a final total of \$98.00. At the bottom, there are checkboxes for newsletter subscription and privacy policy agreement, followed by a 'Continue' button.
